Scientific instruments and apparatus for use in the fields of academia, agriculture, biotechnical and medical imaging, chemical analysis, environmental assessment, fluid testing, food and beverage testing, forensic, genetic screening, geochimistry, life science research, materials characterization, medicine, petrochemical analysis, pharmaceutical analysis, plastics, polymers, semiconductors, atomic spectrometers, gas chromatography apparatus; chromatography columns; apparatus for automatic chromatography; spectrophotometers; elemental analyzers for identifying and measuring the amounts of carbon, hydrogen and other components of organic and inorganic materials; weighing equipment, namely, scales and balances; microscopes; spinning disk confocal microscopes featuring electronic systems that control the position and orientation of the spinning disk control units for spinning disk confocal microscopes; confocal scanning systems for use with microscopes, consisting primarily of a confocal scanner, an illumination source, a charge coupled device detector, computer hardware and computer software for image acquisition; microarray scanners; radiometric detectors, polarizing prisms, computer interface boards and external interface units for laboratory use; automated liquid handling workstations for use in assay procedures, consisting primarily of a platform on which computer-controlled robotic arms are mounted for pipetting liquids and for moving microplates and other objects from one location to another, and featuring computer software for operating liquid handling devices; pipetting tips for use in liquid handling machines in the field of life science research; microplates; microplates and reagents as a kit for use in scientific and pharmaceutical research; cellular screening machines for use in performing cell-based assays by means of luminescence and fluorescence detection; apparatus and instruments for research in laboratories and for analysis of microtitre plate based assays, namely, an instrument comprising an imaging detector, a telecentric lens, illumination light source, emission and excitation filters and sample plate handling mechanism to automatically position the sample plate in a well-defined position for imaging of the sample; computer software that acts as an instrument workstation controlling the instrument, handling measurement protocols, defining sample plate layouts, utilizing dedicated measurement protocols to obtain measurements of measurement techniques and definitions of optical components and that stores the measurement data in a database and lets the user investigate the data and export it for further off-line analysis; cellular luminescence and fluorescence workstations consisting primarily of micro-titre plate readers, automated liquid-flow and liquid-level control machines and instruments and reporting software for analyzing and reporting data obtained from the workstation; laboratory robots; computer hardware; computer software for use primarily in performing fluid research, for analysis in the field of pharmaceutical data; computer software for laboratory information management; computer software for controlling analytical laboratory instruments, and for managing and reporting data generated by such instrument; computer software for controlling chromatography, mass spectrometry and atomic absorption spectroscopy instruments, and for managing and reporting data generated by such instruments; computer software for calibrating and operating differential scanning calorimeters; optoelectronic apparatus and instruments, namely, charge-coupled device cameras; Image tubes for charge-coupled device cameras; spectroscopy equipment; electromagnetic detectors for use in digital radiography; air analysis apparatus; electronic air quality measuring devices or sensors for providing measurements that are interpreted or translated to allow for monitoring, detecting, recording, and reporting air quality, ozone levels, humidity, temperature, airborne contaminants, airborne toxins, odors, emissions, radiation, gases, chemical and biological hazards, and other air contaminants and pollutants by wirelessly transmitting the measurements to a computer; laboratory apparatus, namely, an imaging system comprising computer software, computer hardware, monitors, cameras, optical couplers, optical polarizers, light filters and polarizing compensators for the measurement and analysis of stress, polarization, retardation and related properties of both macroscopic and microscopic samples; computer software for research purposes for viewing, measuring, and analyzing digital images, including color imaging, namely, as a computer with a display, or as a system with computer hardware; laboratory equipment, namely, digital imaging systems comprising an illuminator, a digital camera, optical interference filters and a tunable filter, used for fluorescence optical imaging of samples, and computer software for use in operating the digital imaging system, or interpreting the images obtained thereby, computer, adapters for lenses and microscopes, all of the foregoing sold separately or as a unit for fluorescence optical imaging laboratory equipment, namely digital imaging systems comprising a digital camera, computer hardware, controllers for fluorescence optical imaging of samples or of natural scenes, and computer software for use in operating the digital imaging system, controlling the microscope to interpret the images obtained thereby, and adapters for microscopes and lenses, all of the foregoing sold separately or as a unit for multispectral optical imaging; laboratory and clinical laboratory digital imaging systems primarily comprising computer software, computer hardware, computer monitors, cameras, liquid crystal compensators, digital controllers, circular polarizers and optical light filters for optical imaging; automatic laboratory equipment, namely, a robotic workstation for transferring, dispensing and diluting liquids in drug screening applications; laboratory apparatus and equipment, namely, automated light microscope system consisting primarily of a light microscope, computer hardware and computer software for optical imaging; computer software for application and database integration; computer software for creating searchable databases of information and data; computer software for the collection, editing, organizing, modifying, bookmark marking, transmission, storage and sharing of data and information; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface; computer software that provides web-based access to applications and services through a web operating system or internet portal; computer software to automate data warehousing; computer software for creating searchable databases of information and data; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface, wherein the data is integrated and wherein the data and information is contained within databases and wherein the data and information do not relate to customer care, financial management, billing management or ophthalmologic data; computer software for the collection, editing, organizing, modifying, bookmark marking, transmission, storage and sharing of data and information, wherein the data and information is contained within databases and wherein the data and information do not relate to customer care, financial management, billing management or ophthalmologic data; computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface, wherein the data is integrated and wherein the data and information is contained within databases and wherein the data and information do not relate to customer care, financial management, billing management or ophthalmologic data; computer software that provides web-based access to applications and services through a web operating system or internet portal; computer software to automate data warehousing of documents, wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; BIOS (basic input/output system)
computer program; computer search engine software; scientific instruments and devices for the development, testing, screening and analysis of pharmaceuticals, for chemical screening and analysis, for the testing, screening and analysis of biological substances and for nucleic acid characterization and diagnostic applications; computer hardware and peripheral devices used in the development, testing, screening and analysis of pharmaceuticals, for chemical screening and analysis, for the testing, screening and analysis of biological substances and for nucleic acid characterization; computer programs for operating and controlling automatic laboratory equipment used for transferring, dispensing and diluting liquids in drug screening applications; computer programs for use in robot manipulation; modular tables that can be interconnected to form a variety of system configurations for use in laboratory automation; laboratory workstations; software for operating robotics with microplate readers, washers, and incubators for pharmaceutical laboratory use; scientific apparatus formed in a semiconductor or insulating material wafer or chip, said apparatus to perform chemical or biological material analysis; microfluidic devices and instruments used for the development, testing, screening and analysis of pharmaceuticals, for chemical screening and analysis, for the testing, screening and analysis of biological substances and for nucleic acid characterization; laboratory equipment, namely, robot manipulators, laboratory consumable dispensers, laboratory sample conditioners, namely, incubators, stirrers, mixers, dispensers, and aspirators; laboratory measurement devices for measuring characteristics, namely, absorbency, weight and volume of pharmaceutical samples; pipettes; pipette tips, glassware and filters for use in laboratories;automatic laboratory equipment, namely, a robotic workstation for transferring, dispensing and diluting liquids in drug screening applications comprising automated pipettors configured to dispense fluids into and remove fluid from microtiter plates; computer-controlled laboratory robots; computer software for scientific analysis of genetic sequences; computer software for controlling and managing patient medical information; downloadable scientific and medical data via the internet; computer software for medical services, namely, medical diagnostic software and medical testing software; computer software used by research scientists to acquire, manage and analyze molecular biology and life science data and information; computer software, namely software for providing bioinformatics database management; optical imaging devices, namely, a fluorescence imaging system comprised of computer imaging hardware, a computer, monitor and imaging software for use therewith; electronic light imaging system for detecting very low levels of light, namely, a ccd camera and light-tight imaging chamber for scientific and engineering use; computer software used to acquire, store, archive, retrieve, track, coordinate and analyze internal light images for medical research and scientific purposes; computer program which allows the collection of data from various types of analytical instruments, the processing of such data, the performance of various types of statistical procedures, and the presentation of the information on a personal computer screen, for use in hospitals, clinics and scientific research laboratories; computer software for use in genetic research and analysis; computer software for use in diagnostic DNA analysis; computer software for scientific analysis of genetic sequences; computer software for use in genetic, diagnostic and therapeutic applications; software in the field of DNA research for acquisition, analysis and processing of scientific, diagnostic, pharmaceutical, biological, biotechnological and veterinary data; and user manuals sold as a unit with the foregoing goods.
