Semiconductors; semiconductor chips and chip sets; microprocessors; customized microprocessors; computer chips, integrated circuit chips and semiconductor chips for use in computer and network security applications; semiconductor chips and electronic circuit boards for use in servers, switches and routers for network and computer security; Data processors used in computers, security sub-systems networking equipment, namely, hardware accelerators, computer accelerator boards, offload engines, computer chips for encryption, crypto chips and other networking equipment, namely, routers, switches, load-balances, web-servers, firewalls, virtual private network gateway, computer network servers for data load-balancing, and other computer equipment, namely, servers and work stations; computer software for offloading data for load balancing; Embedded general purpose micro processors; application specific integrated circuits (ASIC); application standard part, namely, semiconductor device for development and running applications on the part, namely, for networking, web, and multimedia applications; downloadable operating microcode for use with networking applications, web applications, multimedia applications; embedded operating applications for networking, wireless, storage, consumer, and multimedia equipment; broadband gateway network routers; network attached storage systems comprised of microprocessors, embedded operating software and connecting computer chips for use as component parts of IP cameras, printers, multi-function printers, USB dongles, video conferencing systems; video processors; application specific standard products (ASSP), namely, encoders, television decoders, optical filters; software for video processing, namely, editing, manipulation, graphics rendering; video processing modules, namely, video, moving pictures experts group (MPEG) video, networking processors for use as component parts of video processing subsystems, video processing systems, video conferencing systems, broadcast cameras, sporting event video systems, video distribution systems; Software for use in switches, routers and computer servers for managing, operating, and securing local and wide area computer networks and network products; application specific integrated circuits, computer boards, and computer processors used in, and for operating and securing, computer hardware, namely, computer network servers, workstation, desktop, and laptop computers, and PDA's; Software, for use either in a stand-alone mode or along with a video processor, which enables wired and wireless transmission and distribution of high definition video, audio and control signals; Computer software for ensuring security and for providing searching capabilities which allow prioritization, characterization and classification of data; Feature of a computer chip which prevents the execution of unauthorized software and prevents the unauthorized manufacturing of finished products using the chip; Semiconductor chips, namely, programmable, low-power, system-on-a-chip for digital baseband and packet processing functions in connection with base stations; Software for use in cellular communication equipment, base stations and radio network controllers; computer interface boards; computer processors; computer hardware; computer network services; computers; laptop computers; desktop computers; mobile handsets; software for use with audio/video processors; software to enable wired and wireless transmission of audio, video and control signals; Electronic products for the manipulation of the frequency, time and amplitude characteristics of audio signals, namely, audio processors; video processors; computer processors with search technology for use in network search applications for networking and communication infrastructure equipment; computer security software, namely, data and identity verification software; computer software for searching network information, traffic and data; semiconductors and software for wireless communications; Set-top boxes; digital TV and high definition multimedia players; video processors and picture quality processors for terrestrial, cable, and satellite systems, and Internet; semiconductors for cable, satellite and terrestrial television converters; Semiconductor chips that process signals for video, audio, and picture quality post-processing; Server adapters; Multi-core RISC system on chip processors for data center and cloud applications; system on chips for micro-server and server, Ethernet fabric, software defined networking and network function virtualization processes; Ethernet switches; semiconductor chips; Ethernet switching chips; microprocessors, namely, networking chips; switch silicon, namely, Ethernet switches, Ethernet switching chips and packet processors; network adapters; application acceleration adapters; programmable network adapters; computer network adapters, server adapters, switches, routers and hubs; computer network adapters, server adapters, switches, routers and hubs using Federal Information Processing Standards (FIPS); Network appliances in the nature of computer hardware; Processors with search technology for use in network search applications for networking and communication infrastructure equipment; Multi-function computer accelerator boards and network interface controllers for security, transmission control protocol (TCP), compression/decompression, and Intrusion Prevention/Anti-virus processing in secure network services and storage applications; computer acceleration boards and application acceleration processors; Ethernet network interface cards; Multi-function computer acceleration boards featuring network services processors, storage service processors, secure
communication processors and communication processors; baseband processors, integrated single chip semiconductors, single chip macrocells, remote radio heads, namely, remote radio transceivers, computer hardware, namely, single-chip hardware accelerators, digital signal processors for accelerating cellular signals; data processors for networking, security and data plane processing, Radio Access Network (RAN) processors; software and hardware for use in data load balancing; computer hardware, namely, web-servers, firewalls, and virtual private network gateway devices in the nature of computer control hardware for gateway routers, computer servers and computer work stations consisting primarily of computer hardware; computer hardware, namely, hardware security modules and computer peripheral devices for cryptographic and data security; hardware security modules comprised of electronic encryption units; computer network adapters; computer network security adapters; computer boards, and computer processors used in, and for operating and securing, computer hardware, namely, telecommunication and data networking infrastructure equipment, computer network servers, workstation, and desktop; multi-core Reduced Instruction Set Computing (RISC) system on chip processors for data center and cloud applications, namely, web hosting, data analytics, clustering, high frequency trading, cloud computing, enterprise resource planning, search, financial transaction processing, social media; integrated circuits, namely, system on chip processors for micro-server and server computing processes; multi-core Reduced Instruction Set Computing (RISC) system on chip processors, integrated circuits in the nature of system on chips and server adapters which monitors and debugs networks; computer software that enables the search of a database to find specific computing or networking events or generic computing or networking transaction logs and software for visibility and instrumentation; Computer software and computer hardware for host and embedded microprocessor systems for use in development, modification, debugging, troubleshooting, and performance enhancement; Multi-core Reduced Instruction Set Computing (RISC) system on chip processors for data center and Multi-core Reduced Instruction Set Computing (RISC) system on chip processors for data center cloud applications, namely, Big Data Analytics, Scale Out Object and Block Storage, Web Caching and Scale out SQL/NoSQL Databases; Software used in computer and network applications and products; systems and boards used in servers, switches, routers, gateways, and network accelerators, adapters, appliances, and other computer, network processing related products, namely, Network Interconnect for direct and switched communication, integrated storage for permanent data storage, SOC compute for application execution; Semiconductor chip interconnect for coherency; Interconnecting; interconnect on chips for micro-server and server, software defined networking and network function virtualization processes; programmable switches; Computer software for configuring and managing adapters communicating with other devices; Computer networking hardware; Network devices, namely, adapters, switches and integrated circuits for network communication; Computer firmware and software for operating and managing network devices; Computer software for managing and controlling integrated circuit devices, switches, and controller boards interfacing with peripheral devices; Integrated circuit devices and controller boards, fibre channel switches, and software and firmware for managing, controlling and interfacing with personal computers, workstations, peripheral devices and instruction manuals provided as a unit therewith; Integrated circuits; controller circuit boards; fiber channel switches; software and firmware all used for controlling and interfacing with the aforesaid goods and instructional manuals sold as a unit therewith. Computer software, hardware and processors for artificial intelligence, text analysis processing and deep learning processing.
