systems for simulators; computers and computer systems; data recording and reproduction apparatus; data carriers,
included in this class; fire control systems consisting substantially of electronic detection and control systems as well as
test and control apparatus assembled into electronic equipment for that purpose; battlefield reconnaissance systems,
consisting substantially of sensor platforms with sensors (such as day and night vision apparatus, seismic detector, laser
range finder, radio direction finder), monitors for displaying sensor data, remote data transmission equipment, data
processing apparatus; apparatus, more specifically ranging apparatus for automatic target acquisition, target tracking,
target classification and target recognition apparatus for air and ground vehicles as well as stabilization equipment for that
purpose; infrared cameras; apparatus for analysis and identification of materials, more specifically of waste products;
laser-induced fluorescence analysis apparatus for non-medical purposes; leak monitoring apparatus and systems consisting thereof; apparatus for detecting impurities and inclusions in the ground; ground penetrating radar apparatus; apparatus for detection and analysis of pollutants in the seas and inland waters; sonar
systems, more specifically bow sonars, towed sonars, stern towed array sonars or synthetic aperture sonars and
components hereof; command and weapons control systems in surface and underwater vehicles, consisting substantially
of surveillance sensors for the air space and sea area, and networks and data circuits for data transmission and data
distribution; data processing apparatus and computer, image compiler; control console with monitors and control panels,
interface units for connection of effectors; mine detectors and systems composed thereof; acoustic homing heads,
aoustic steering system for underwater driven steering bodies, electronic and electro-acoustic activation and ignition
apparatus for mines; underwater ranging apparatus; ship apparatus and instruments, integrated navigation systems and
electric/electronic control systems, more specifically for ships; navigation apparatus; autopilots equipment for inland
waterways and seaways, ports and coasts consisting substantially of monitoring apparatus; apparatus and installations
for iceberg detection; surveying apparatus and systems composed thereof for water bodies and components thereof, side
scan sonars, laser position measuring apparatus, data recording apparatus and evaluation apparatus; electric/electronic
installation apparatus and apparatus for buildings and areas, sensors and evaluation apparatus for that purpose; control
and display consoles as well as protective casings for afore-mentioned apparatus, systems and installations;
workstations and control clusters, respectively including computers, monitors and computer control consoles, for control
rooms, more specifically for control rooms in ships; electric and electronic apparatus for control and regulation of power
generators and drive motors; electric/electronic apparatus for protection against torpedoes and/or for control of anti-
torpedo-torpedoes, of countermeasures and/or disruptors; jamming transmitters, included in this class; electronic control
and navigation apparatus; depth gauges; gyro compass for underwater running bodies and/or underwater vehicles, more
specifically for torpedoes and anti-torpedo-torpedoes; batteries having power supply sections for underwater vehicles,
for torpedoes and anti-torpedo-torpedoes; casing and casing sections for underwater running bodies, namely electronics
section with control, regulation and navigation equipment, power supply section with battery and power units, sonar head
with sonar installation; electric/electronic apparatus and instruments for steering underwater vehicles and/or underwater
running bodies, more specifically of waste products; underwater vehicles and/or underwater running bodies, equipped
with or without explosive charge, detonator, TV camera, active sonar, acoustic transponder system and/or fiber optics for

7582
transmission for identification and/or destruction of mines, as well as for control and monitoring, for processes for a detection of target traces, for target classification and target identification, for processes for calculation of a target threat and for weapon selection, included in this class; electronic systems and apparatus for planning and assistance of weapons selection for combat monitoring; head sections with sonar head.

Cl.13; Mines, warheads with explosive charge; launch containers and/or launch apparatus for underwater running bodies, namely for torpedoes, for anti-torpedo-torpedoes, for countermeasures and for warheads, more specifically mines, grenades, rockets, missiles; military countermeasures, included in this class; underwater running bodies, namely torpedoes and anti-torpedo-torpedoes; grenades, rockets, missiles and their components included in this class; casing and casing sections for underwater running bodies, namely stern section with helm, drive section with rocket motor, warhead with explosive charge, training head without explosive charge; warhead or training head; weapons, namely ballistic weapons, projectiles, self-propelled weapons; sights, other than telescopic sights, for guns.

Cl.42; Providing technical concept and definition studies; research, technical planning and technical development of installations and systems in the fields of underwater acoustic engineering, high frequency engineering, data recording, data and signal processing, environment engineering, simulation and training; providing technical documentation; computer software design.
