Cl.7; Wind mills, wind power plants, wind turbines, including offshore wind mills, offshore wind power plants, offshore wind turbines; mill towers and masts, blades, blade hubs, millhousings, bottom-mounted and floating mill foundations, rotation devices, yaw rings and gears, devices for setting the pitch of the blades, brakes and brake devices, main shafts, universal joints, transmission devices, clutches and electric generators, cooling devices, helicopter platforms for wind turbines, corrosion protection and reserve power supply plants; engines, powertrains, and generic machine parts; parts and fittings for wind turbines and windmills; control mechanisms for machines, engines or motors, including control mechanisms for wind turbines and windmills; machines for the control and redistribution of wake in offshore wind power plants; control mechanisms for wind turbines and windmills, including power modes for wind turbines and windmills; control mechanisms for wind turbines and windmills, including control mechanisms for the control of wind turbine windmill capacity in offshore wind power plants; parts and fittings for all the aforesaid goods.

Cl.9; Electrical, electronic and computer equipment for wind mills, wind power plants, wind turbines and other wind-operated machines; control and monitoring equipment including for automatically turning on or off the generator and for automatic starting after public power line break-downs, apparatus for overvoltage protection against strokes of lightning; microprocessor equipment for controlling and monitoring voltage, frequency, phase conditions, rotor speed, efficiency and thickness of brake pads, temperature, wind direction and wind speed; vibration and oscillation sensors for installation in mill housings; watt-hour meters; measuring, detecting and monitoring instruments, indicators and controllers; electronic control systems, including control systems for wind turbines and windmills; energy control devices; energy regulators; flow measuring apparatus, including flow measuring apparatus for use in connection with wind turbines and windmills; flow control installations [electric], including flow control installations used in connection with wind turbines and windmill; electricity storage apparatus; power modules; electronic control systems, including control systems for the control of wind turbine and windmill capacity in offshore wind power plants; electric control devices for energy management; computer software and computer hardware for the operation, control, maintenance and optimization of off-shore wind turbines; application software in the form of apps for the use in connection with wind mills, wind power plants, wind turbines; flow control installations; parts and fittings for all the aforesaid goods.

Cl.42; Scientific and technological services and research and design relating thereto; conducting research projects concerning offshore wind mills, offshore wind power plants, offshore wind turbines and other offshore wind-operated machines; technological assessment and analysis of offshore wind power plants, including analysis of loads, electrical infrastructure and performance of the wind turbines and windmills; technological assistance concerning offshore wind mill and offshore wind power projects and conducting such technical projects, development and testing of offshore wind mills, offshore wind power plants, offshore wind turbines, offshore wind-operated machines, and components therefor; analysis of technical data; providing of technological information and data; preparation of technical reports; operation in the nature of monitoring and control of wind mills, wind turbines and wind power plants, including remote monitoring and control of wind mills, wind turbines and wind power plants; advisory, consultancy and information services relating to all the aforesaid services.

Cl.2; Consumables for 3D printers, namely metal powder ink (toner) in powder or liquid form, binding agents; printing inks; printing pastes; inks; ink (toner) in powder or liquid form for printers and copiers; ink-jet ink for ink-jet printers for industrial and office applications; filled (refillable and non-refillable) ink cartridges and ink refill kits for typewriters, printers, 3D printers and other office printing equipment; filled (refillable and non-refillable) toner, toner kits and toner cartridges for 3D printers, laser printers and copy devices; special containers and covers adapted, for the aforesaid goods insofar as included in this class.

Cl.7; 3D printers and their accessories, insofar as included in this class; 3D printing pens [machines] and their accessories, insofar as included in this class; printing machines for industrial purposes; commercial ink-jet printing machines; machines which supply printing machines with ink and systems comprising thereof; storage containers for inks and ink media, adapted for use in printing devices, in particular 3D printers; spare parts for the aforesaid goods, as included in this class; ink supply systems for printers, in particular 3D printers, consisting of ink pumps, ink tanks and ink connections; computer-controlled machines and their components, namely printing machines for commercial purposes as well as their spare parts for the manufacture of three-dimensional plastic articles in rapid prototyping and rapid manufacturing processes.

Cl.17; Plastic material, in particular for use in the production of three-dimensional models by way of additive manufacturing methods, in particular plastics for the fabrication of three-dimensional parts based on digital data using a 3D printer; parts and component parts of all above named goods, insofar as included in this class; accessories for all aforementioned goods, insofar as included in this class.
