Cl.9;Prerecorded video discs and DVDs featuring motion pictures, television series or other short form entertainment programs in the nature of comedy, drama, news, reality and variety content; prerecorded optical and magneto-optical discs featuring music, motion pictures, television programs or other short form entertainment programs in the nature of comedy, drama, news, reality and variety content; prerecorded CDs featuring music and motion picture sound tracks; downloadable music, films and television series; downloadable shows featuring television and short form programs and motion pictures in the nature of comedy, drama, news, reality and variety content; interactive multi-media software for playing games; downloadable software in the nature of a mobile application for playing games and accessing entertainment content for use with computers, portable handheld digital electronic communication devices, mobile devices and wired and wireless communication devices; computer game software for wireless and electronic mobile devices, mobile phones and hand-held electronic devices; computer game discs; video game discs; eyewear, eyeglasses, sunglasses and cases therefor; decorative magnets; cinematographic machines and apparatus; wireless communication devices and systems for computer software for the transmission of audio, voice and images; downloadable animated cartoons; electronic publications, downloadable, namely, magazines and books in the field of entertainment

Cl.28;Toys, games and playthings, namely, action figures and accessories therefor, bathtub toys, kites, toy building blocks, board games, action skill games, manipulative games, target games, bubble making wand and solution sets, children's multiple activity toys, costume masks, mechanical toys, toy vehicles and accessories therefor, dolls, doll accessories, doll clothing, bean bag dolls, toy figures and accessories therefor, play figures, inflatable toys, flying discs, jigsaw puzzles, marbles, plush toys, puppets, ride-on toys, skateboards, balloons, roller skates, toy banks, water squirting toys, and stuffed toys; Christmas tree ornaments; water globes; pinball machines; playing cards; hand-held unit for playing electronic games adapted for use with an external display screen or monitor; hand-held unit for playing electronic games other than those adapted for use with an external display screen or monitor, golf and sports balls, stress relief exercise balls
integrated circuits, microcontrollers, and processors, all for mobile computing devices, internet or things (IOT) devices, namely, near field technology enabled devices, namely, mobile phones, smart phones, tablet computers, software for server functionality; communication apparatus, instruments and equipment for near field communication control of drones; computer hardware and software for the operation and control of automobiles; chipsets and computer battery charging; computer hardware and software for security; computer hardware and software for the operation and control of drones; computer hardware and software for data networking; computer hardware and software for processing images, graphics, and text; computer hardware and software to enable augmented reality and virtual reality applications; computer hardware and software for software for data networking; computer hardware and software for processing images, graphics, and text; computer hardware and software to enable augmented reality and virtual reality applications; computer hardware and software for battery charging; computer hardware and software for security; computer hardware and software for the operation and control of drones; computer hardware and software for the operation and control of automobiles; chipsets and computer software for server functionality; communication apparatus, instruments and equipment for near field communication (NFC), namely, near field technology enabled devices, namely, mobile phones, smart phones, tablet computers, computers, computer printers, routers, headphones, audio speakers, digital cameras, televisions, remote controls for televisions and stereos, electric sensors, home and office electrical power automation systems comprising wireless controllers; communication apparatus, instruments and equipment for near field communication (NFC), namely electronic key cards, key fobs, near field communication (NFC) tags, near field communication (NFC) technology enabled readers and integrated circuits for near field communication (NFC) applications; computer anti-virus and anti-spam software; computer chips, software, and hardware for wireless power transfer for use in charging vehicles; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in devices such as network switches, engine control modules, cat-scan machines, industrial automation controllers, avionics and wireless handsets; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in industrial, consumer and automotive applications; computer hardware and computer software for transferring, storing, converting and displaying medical device data; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID and NFC chips and tags; computer software for charging smart phones, tablets, and mobile electronic devices; computer software for enabling functionality of safety and testing systems, apparatus and equipment; computer software for enabling functionality of sensors for use in automotive, consumer, industrial and medical applications; computer software for managing computer networks; computer software for tracking; computer software, hardware and chipsets for use with wireless communication apparatuses, consumer electronic devices, smart phones, digital cameras, IP cameras, drones, unmanned aerial vehicles (UAVS) and wearable mobile computers; computer peripherals for processing digital signals, for processing background data and information on computer operating systems, for tracking user activity and location, for enabling activation by speech and touch and for detecting sensory cues and launching applications that correspond to specific sensory cues and computer software, hardware and chipsets for use with these goods; computer software, hardware, and chipsets for streaming music and for synchronizing audio speakers in consumer electronics devices; computer software, namely compilers, linkers, support software to assist in the development of stand-alone programs, and software for assisting in the development of object oriented software applications, such as database systems; computer software, namely
operating systems, board support packages (BSP), virtualization technology software, hypervisor software, embedded software, applications programming interface (API) software, software libraries used to create other computer software; applications software for automotive, consumer, health care, medical, aerospace, military, cellular and mobile communications, networking, consumer control, smart energy, and industrial applications, protocol stacks, configuration software, and optimization software; content filtering software, namely computer software for controlling content made available to a user; control plane software; data plane software; data processing apparatus and software for enabling, controlling, managing and monitoring all aspects of a paperless payment and/or access system employing RFID (radio frequency identification) and/or NFC (near field communication) technology, including allowing users to recharge their payment accounts remotely; deep packet inspection software; downloadable computer software for developing computer hardware and software for chips and wireless devices; enterprise security software for use in gateway and other networking devices to provide network security; firewall software; integrated networking, security, and collaboration software; internet security software; intrusion detection and prevention software; load balancing software; VPN (virtual private network) operation software; integrated circuits, computer hardware and software for signal processing in wireless communication apparatuses, consumer electronics devices, portable media devices, mobile gaming devices, pocket computing devices, and smart phones; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers; recording and readers for wireless transmission to and from transponder chips; electronic apparatus for writing and reading of wireless transmission to and from transponder chips; computer programs for controlling transmission of data to and reading of data from transponder chips; data processing machines for fare determination using transponder chips; encoded smart cards; computer hardware, software and peripheral devices used for access control and authentication purposes; wearable activity trackers; wearable computer peripherals; smartphones; wearable telecommunication apparatuses and packaging, namely distributed chip packaging (RCP), and systems-in-package (SiP); radio frequency (RF) power transistors; radio frequency semiconductors; sensors, namely, inertial sensors, pressure sensors, magnetic sensors, touch sensors all for use in automotive, consumer, and industrial applications; proximity sensors; radar sensors; capacitive sensors; acceleration sensors; gyro sensors; sensors for computer interfaces featuring microphone, firmware and electronic integrated circuit chips; sensor systems comprised of sensors, computer software, microprocessors, microcontrollers, and logic or wireless protocols for enabling functionality of sensors for use in automotive, consumer, and industrial applications; electronic test instruments for developing and testing microprocessor-based systems; semiconductor memories; semiconductor devices, microcontrollers, integrated circuits, circuit boards, chips, all for management of operating frequency, voltage and power, optimization of static and dynamic power, power management, power optimization or power reduction; semiconductors, sensors and software for use in automotive, consumer, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications; semiconductors and software for use in healthcare and medical applications; semiconductors, sensors and software for use in wireless connectivity, battery management, smart grid, smart metering applications, engine control units (ECUs) and tire pressure monitoring systems (TPMS); microcontrollers, firmware, sensors, and radio frequency (RF) and analog circuitry devices for use with energy efficient wireless chargers; printed circuit boards namely evaluation boards and reference design kits consisting of software for semiconductors, sensors and microcontrollers and packaging, namely semiconductor packages, medical devices, therapy devices, and medical imaging devices; computer application software, namely, computer software for use in applications for multimedia, graphics video, audio and numerically intensive computations; computer network switching software; computer convergence network software; computer network collaboration software; quality of service software; network access software; networking software for operation of chips; networking software for content processing; content delivery software, applications and development of firmware, applications and development of software; content processing; failover prevention software; stateful packet inspection software; stateful application inspection software; enterprise security software; wireless radio controller software; command line management software; voice over IP software; video over IP software; networking and security software for use with unified threat management equipment, gateways, integrated access devices, routers, switches, controllers, base stations, hubs, and security appliances; utility software for facilitating computer use at remote locations and for facilitating communications among mobile users over networks; computer software for providing security to remote users and for implementing computer, software, and network security measures for remote users; component-based software modeling tool featuring a graphical user interface, automatic code generators and built-in knowledge-base for use in the rapid design, development, implementation, verification and optimization of embedded applications; software for use in developing other software titles; downloadable, searchable electronic publications, namely reference manuals, user guides, application notes and product specifications the subject of semiconductors, sensors and software; user manuals in electronic format supplied with the foregoing.

CI.38;Providing information in the field of telecommunications and telecommunications information relating to wireless communications and mobile technologies; consulting in the field of telecommunication services, namely, transmission of voice, data, and documents via telecommunications networks.

CI.42;Providing information in the field of computers, computer software and computer systems; providing information in the field of design and development of computer data networking; providing information in the field of network security and confidentiality; design for others of integrated circuits, semiconductor devices, integrated circuits, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software, electro technical and electromagnetic modules and their parts and building elements, data storage apparatuses, interfaces, smart cards, controllers for smart cards, controllers for RFID chips and tags for other software; computer software development in the field of mobile applications; design and development of wireless communications systems for
transmission and reception of voice, data and video; design and development of battery charging technology; design and development of data networking systems; design and development of network security and computer security systems; design and development of computer hardware and software for the operation and control of drones; design and development of computer hardware and software for the operation and control of robots; design and development of computer hardware and software for the operation and control of automobiles; cloud computing featuring software for transferring, storing, converting and displaying medical device data; developing wireless power transfer technology for use in charging vehicles; platform as a service (PAAS) featuring computer software platforms for use in developing, programming, building, and prototyping IoT (internet of things) devices; platform as a service (PAAS) featuring computer software platforms for wireless acquisition, transmission, conversion and storage of medical device data; providing technical information in the fields of semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software; consulting in the field of telecommunications technology; design and development of wireless communications systems for authentication purposes; providing temporary use of online non-downloadable software applications, development platforms, and development tools that enable software developers to develop, program, build, and prototype software for integrated circuits, chips and data processing equipment; computer programming services; research and design of antennas for scanning, reading and interpreting RFID chips and tags; research and design of NFC (near field communications) apparatus, instruments and equipment; advisory services in relation to all the above.
