Mineral and aerated waters and other non-alcoholic drinks; fruit drinks and fruit juices; syrups and other preparations for making beverages.
Description of the Bottle: The bottle has four critical components to impart a stronger, stable, smart and steady appearance.

- **Base:** Petaloid base with five high heels for standing stability of the bottle
- **Grip:** Chisel area is the USP of this unique bottle design aligning contours of an axle
- **Label:** Cylindrical area with two ribs to reinforce and contain bottle expansion
- **Shoulder:** Tapered and short neck for uniformity and reduction of extra resin

**Bottle Base:** The radius and arches of bottle base is contoured with rounded edges to withstand stress crack and provide resistance to alkaline solutions.

**Grip:** PET bottle designing for Carbonated Soft Drinks has been challenged to provide prominently defined chisel shapes curved into grip section of bottle. This is a unique design providing carbonation retention with steep curvature offering a better hold and grip of the bottle.

**Label:** Two ribs run in parallel across the circumference of label area of the bottle. The ingrained grooved ribs provide extra mechanical strength to the bottle compensating radial and axial expansion of bottle under abusive handling and storage conditions within certain climatic conditions.

**Branding:** Appreciably elevated at eye level with this unique Eminence design, in comparison to earlier pack where branding often got overlapped and shadowed under the grip area of bottle.

**Shoulder:** The cylindrical label section gradually rises through a tapered pyramid shape to optimize carbonation retention properties. Neck weight of the bottle is contained with short stout structure to support sustainability and savings in PET resin.
