Cl.9;Computer hardware; computer network connectivity hardware and computer network connectivity software; computer hardware with embedded computer software, namely, modules, microprocessors, single-board computers and satellite communications routers; wireless M2M (machine-to-machine) device networking products, namely, wireless range extenders and peripherals, wireless serial servers, enterprise routers, VPN concentrators, routing gateways, gateways, routers, embedded modules, network adaptors, modems, network routers; wireless IoT (Internet of Things) device networking products, namely, wireless range extenders and peripherals, wireless serial servers, enterprise routers, VPN concentrators, routing gateways, gateways, routers, embedded modules, network adaptors, modems, network routers; computer network connectivity hardware and computer network connectivity software, namely, software and middleware used to allow enterprise software applications to interface with remote devices and to allow connectivity, device management, and memory storage, all via a computer network; computer hardware, namely, cellular routers, gateways, wireless communication adapters, serial servers, intelligent console servers, electronic sensors and cameras, all used to monitor and collect data and transmit it to a host or a remote computer system used to provide alerts in the case of triggering events and to provide surveillance; cellular routers with embedded software; programmable gateways; cellular routers with integrated VPN; gateways for distribution automation; VPN concentrators; customizable routing gateways; console servers; console servers for power management and monitoring of network devices; embedded system-on-module and single board computers; intelligent modules that allow electronic devices to connect to a wireless local area network; secure network device server modules; serial to Ethernet modules; microprocessor core modules; communications and control processors; intelligent I/O expansion chips; Ethernet-intelligent operator interfaces; expandable control boards; wireless RF modules; Ethernet gateways supporting wireless RF modules; IP gateways; wall routers; long-range industrial radios; intelligent wireless energy management outlets that have the ability to measure and control use of electricity via a standard electrical outlet; real-time environmental sensors for measuring and transmitting temperature, humidity and light information; wireless vehicle bus adapters; long range RF Modems; range extenders for wireless networks; stand-alone radio modems; wireless Ethernet bridges; wireless adapters; OEM modules; adapters for remote monitoring and control for multipoint networks; adapters for serial and USB devices; USB to wireless adapters; long-range OEM RF modules; terminal servers; serial device servers; network serial concentrators; Ethernet network controllers; switched USB expansion hubs; network attached USB hubs; USB-to-serial converters; USB security and monitoring cameras; USB sensors; serial cards; multi-modem communication adapters; multiport serial adapters: USB expansion hubs; USB remote access servers; computer printer servers, network device servers, and network serial concentrators

Cl.38;Computer services, namely, providing telecommunications access for device connectivity via computer networks; providing telecommunications access for mobile device connectivity by means of a host platform on the internet; transmission of M2M (machine-to-machine) data; transmission of IoT (internet of things) data; wireless data network services for others, namely, electronic transmission of data related to connectivity, device management, and memory storage via wireless networks; telematic services for sending of information, namely, providing machine-to-machine (M2M) and Internet of things (IoT) mobile-device management (MDM) connectivity over long distances and/or remote locations.

Cl.42;Providing temporary use of online non-downloadable software for managing machine-to-machine (M2M) and Internet of Things (IoT) communication; providing machine-to-machine (M2M) and Internet of Things (IoT) communication integration services, namely, the integration of disparate computer systems, networks, hardware and software through the application of wireless communication technology to facilitate M2M and IoT communication via web based browsers, personal digital assistants, mobile phones, embedded microprocessors, sensors and other electronic devices; providing a website in the nature of a web hosting platform for allowing users and enterprise software applications to interface with remote devices and to allow connectivity, memory storage, device management, device monitoring, device tracking, and

8123
device auditing, all via a computer network; providing temporary use of on-line non-downloadable software allowing users and enterprise software applications to interface with remote devices and to allow connectivity, memory storage, device management, device monitoring, device tracking, and device auditing, all via a computer network; providing SaaS services, namely, providing application software for others that allows users or enterprise software applications to interface with, connect to and manage remote devices and to provide messaging, management and memory storage services; providing PaaS services, namely, providing a computing platform and solution stack that allows users or enterprise software applications to interface with, connect to and manage remote devices and to provide messaging, management and memory storage services; providing IaaS services, namely, providing computer software platforms for creating, managing, and deploying cloud computing infrastructure services; design and development of computer software and middleware for others; computer network design for others; consulting with regard to computer systems, computer network connectivity hardware and computer network connectivity software and middleware; technical support services, namely, troubleshooting and diagnosing computer system software and computer network connectivity software and middleware; computer services, namely, providing remote management of remote devices via computer networks; technical consulting and assistance with computer-based information systems and components, namely, technical consulting services in the field of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; engineering design services in connection with computer hardware, computer software, electrical and electronic circuits, including product design, product integration, product testing and certification
